DETAILED ACTION

Claim Objections

1. Claims 26 and 32 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In claim 26, arranging multiple devices in an array does not further limit the structure set forth in claim 16. In claim 32, the intended use of the claim 16 structure does not further limit the claim 16 structure.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 16-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 16, lines 2-4, "configured to be one of disposed directly on and integrated in" is indefinite. This language is alternative in that it is drawn to two different structures which are not equivalent. Thus, claims 16-33 are render indefinite because it is not clear as to what structure applicant intends to claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 16 and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kim et al (5,680,410). See Fig. 1A.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al as applied to claim 16 above, and further in view of the following. The manner of attaching the control element would have been an obvious matter of choice for one of ordinary skill in the art at the time of the invention. Selection of a preferred laser as a welding source would have been an obvious matter of choice for one of ordinary skill in the art at the time of the invention.

Art Unit: 2828

8. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al as applied to claim 16 above, and further in view of the following. Arranging a plurality of the claim 16 elements in an array would have been an obvious matter of duplication of parts for one of ordinary skill in the art at the time of the invention. No unexpected results are seen to accrue.
